

Welcome to the zioxi catalogue

If you want learning spaces that work as hard as you do, then you are in the right place.

zioxi designs and manufactures innovative products to support and inspire learning. We enjoy solving problems through design, producing inspiring products that are integrated into practical and stunning learning spaces.

We believe that classrooms should be places where students want to learn and work places should inspire and motivate. We are lucky enough to work with some amazing customers to create wonderful environments. Take a look at our **Case Studies** on pages 144-155 for inspiration.

Innovation is a key part of our culture, and we have been working hard to develop our products and create the classroom of the future. Our web application **onView** continues to be improved with new features and is available on our **Trolleys, Desks** and **powerHubs**. **onView** gives you total control over your learning space and you can find out all about it on pages 10-17.

The health and comfort of our customers continues to be one of our top priorities and we are adding all the time to our range of height adjustable desks. This year sees the addition of a **height adjustable collaborative desk** so that all users can choose to stand and collaborate together.

If you want to transform your learning space, but are not sure where to start then take a look at our inspiration section on pages 4-9. These pages show example designs for different spaces, including collaborative working, active learning, ICT and Libraries. We combine a range of different zioxi products to make the perfect environment for learning.

Read, enjoy and if you want any advice or help to transform your spaces, call us on **01844 280123** or visit **www.zioxi.co.uk**

About zioxi

We do it all... from design to install.

We have teams of dedicated, talented people, passionate about their work to design, build, plan, manufacture, deliver and install furniture that supports and inspires learning.

It's not your job to know how to put learning spaces together – it's ours, and we take great pride in supporting our customers from start to finish. We are highly involved at every stage of the process – helping make good decisions, giving accurate plans and costs, checking we've got the order right, delivering when we say we will, installing it and making sure everything has gone to plan.

"We were looking for an enthusiastic company to help us deliver specialist furniture solutions. We have certainly found that in zioxi."

Mike Othick,
Leeds Trinity University

"zioxi furniture met our need for agility and flexibility and enabled us to make our vision a reality."

Jane Loomes, Head Teacher.
Jesmond Gardens
Primary School

"The organisation, communication and customer care were second to none"

Leigh Wolmarans, Head Teacher.
Lings Primary School

Contents

10 onView

Control your zioxi furniture remotely with onView.

18 Mobile Device Charging

Safe, secure and ready when you are, charging and storage solutions for mobile devices.

36 Integrated ICT & AV

From desk to ICT workstation at the touch of a button. For ICT as and when you want it.

66 Tables

Round, square, wedge-shaped, rectangular, trapezoid and one in the shape of an apple. And you thought you knew tables...

88 Storage

A place for everything and everything in its place; products to organise your stuff and your space.

102 Seating

Whether it's height-adjustable, mobile or stackable there's a seat here for you.

124 Space Dividers

We know that spaces need to change so we have put together a range of novel space dividers.

130 Fixed Furniture

Built in access to everything - including the kitchen sink.

134 Swatches

To give you an idea of colours and finishes.

140 The zioxi Touch

Learn more about what we do and how we do it.

144 Case Studies

The proof of the pudding. This is what it looks like in the real world. Real life case studies from five recent projects.

156 How to order

All the information you need – contact details, information about delivery and installation.

Integrated ICT Teaching Space

Multipurpose learning

Gone are the days of boring classrooms and lecture spaces. Teaching spaces now include areas for collaboration and group work, individual working and flexible desks for larger groups. **zioxi** collaborative tables are perfect for this type of teaching environment with a screen at one end to share work. t41 tables provide flexibility for group working with powerHubs to support BYOD.

Learning Resource Centres

Modern Libraries and Learning Spaces

The recent move towards the use of mobile devices means that learning resource centres now need to be more multifunctional than before. Not only do they need to provide functional storage for books but also lots of different areas that encourage group work or one to one research with mobile devices.

The Showcase Classroom

Inspiring, creative & Interactive

The showcase classroom is an inspiring, creative and interactive learning environment. It's important to include lots of different areas to encourage different styles of learning and support the use of a wide range of ICT. Colourful glass panels and flexible furniture encourage spontaneous creative thinking and group brainstorming.

onView

Remotely manage your charging trolleys, check the battery level of your powerHub or see if a desk is free. Just some of the things you can do with **zioxi onView**. And the best bit – you can do it anywhere from a phone or computer!

Control your furniture over the web!

We believe furniture should be intelligent and now with the integration of **onView** it is! **onView** is a web based platform for the control and monitoring of any **onView** enabled furniture item using a phone or computer.

onView can help...

Save Money by automatically turning off power when it's not required or by prolonging battery lives of mobile devices.

Improve security by locking away monitors at night or alerting you if a charging trolley isn't locked.

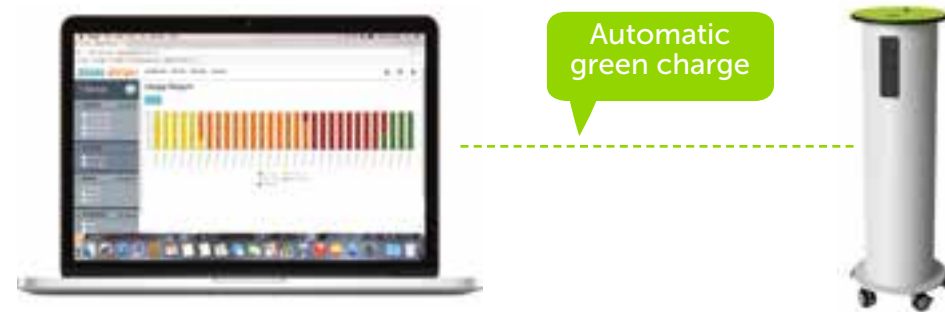

Go green through automatically charging mobile devices or rechargeable powerHubs at times of maximum green energy generation.

Increase student satisfaction by providing students with real time desk & table availability on their phones or ensuring devices are charged and ready for learning.

Reduce staff time by automating tasks and providing alerts only when intervention is required.

Improve utilization by providing real time & historic data on asset use, location and state.

These are just a few of things that **onView** can do to help. What can **onView** do for you?

zioxi Charging Trolleys & Cabinets

- Smart Charge**
prolongs battery lives and saves energy.
- Green Charge**
automatically charges at low carbon energy times.
- Automatic Schedules**
for setting charging whenever you want.
- Device Count**
so you know how many devices are on charge and will be ready for use.
- Email Alerts**
if a trolley isn't locked or plugged in when it should be.
- Remote Alarm**
to let you know if a trolley is accessed out of hours.
- Temperature**
monitoring and control to maintain devices' battery health.
- Customizable Rules**
to trigger alerts or actions as you need.
- Reports**
on trolley usage, charge times, location and much more.
- Software Updates**
so your trolley is always getting smarter.

Mobile Device Charging and Storage

Aaah! Tucked up safe and sound, charging away so they are raring to go in the morning. Solutions for secure storage, syncing and charging iPads, tablets, laptops, phones and other mobile devices. From cupboards with hidden abilities to mobile power on wheels.

zioxI iPad Charging Trolleys

Compact, easy to move and unobtrusive

This is where iPads go after a hard day’s learning. The iPad trolley provides charging and secure storage for 16, 20, 32 or 40 devices. Accommodates up to 10” iPads and other tablet devices in all standard case designs*, with doors that fold back right out of the way. Available in charge only, USB charge, USB charge and sync and Sync over Ethernet variants. Lock options of key, digital code with master key and RFID access card/FOB.

For classrooms, breakout areas and anywhere you need an iPad or tablet PC.

zioxi Charging Locker Modules

Multi-user, compact charging modules

Each locker is accessed via an individual code lock (with a code chosen by the user with a master key override) or a key. These compact locker modules are designed to sit on work surfaces and within shelving but can also be stacked.

A 1:1 charging locker has a separate compartment for plugging in and storing power adapters, users simply connect their device. A BYOD charging locker provides mains power sockets in each compartment so users bring their own charging cable and adapter.

For classrooms, libraries, ICT areas and any space where multi- user charging facilities are required.

zioxi Charging Locker Banks

Floor standing mobile device charging banks

Create banks of mobile device charging lockers with these 16 and 20 compartment floor standing units designed to charge tablets, chromebooks and laptops*. Lockers are opened with a choice of digital code lock (with master key), mechanical combination lock or RFID access card (or just a key) giving the option to dedicate lockers to individuals or enable multi user operation – like a hotel safe.

For libraries, ICT areas, open areas – in fact any space where multi-user charging facilities are required.

zioxi syncDeck and powerDeck

Easy access sync and charge stations

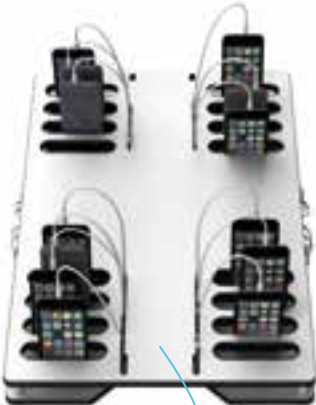

If you want easy access to your iPads, iPods, phones and other small USB powered mobile devices these are ideal. Slot your devices into the **zioxi** syncDeck with its easy access USB connectors and they'll charge and sync while not in use. Also available as charge only powerDeck.

With integral power supply, intelligent USB electronics, hidden cable management and robust construction syncDecks and powerDecks sit on worksurfaces or shelves and can be unplugged and used to carry devices around safely.

Great for classrooms, offices, museums and any back office mobile device setting.

zixi Rechargeable powerHubs

No floor boxes? No problem!

Bring power to any laptop, tablet or phone with the **zixi** Rechargeable powerHubs. Simply wheel the hub to a power source to charge and then place them where you need power. With different options for battery capacity and variants for USB A, USB C and/or mains power. A great way to ensure mobile devices stay charged, so your students can get on with the job in hand.

For use anywhere you need power. Classrooms, breakout spaces, open-plan learning zones and libraries.

Integrated ICT & AV

Spaghetti cabling, too far from the plug socket, takes ages to set up... It doesn't have to be like this. With the right furniture, cable management and power solutions it can all work beautifully.

zioxi Collaborative Tables

Multimedia team work tables

With a shared display screen as its centrepiece the **zioxi** collaborative table enables groups of people to share screens as they work so they don't have to huddle around one laptop. Comes in a range of shapes and sizes to accommodate from five to nine people. Available in a variety of colours with integrated power, data and control panel options. Screen connectivity can be provided using a choice of wired or wireless AV solutions including those from Extron & Crestron, all housed & easily accessible within the 6U AV & PC storage tray.

For open-plan learning zones, ICT suites, libraries, meeting rooms and conference facilities.

✂ (see p159)

Finishes
Epoxy-coated frame RAL9010 (white). Worksurface compact laminate.

removable section for multipurpose use.

zioxi Collaborative table fitted with powerDome & cableRing option

zioxi Collaborative table mount with control Panel

zioxi HA Collaborative Tables

Sitting or standing? You choose!

Collaborative working encourages students to take control of the subject matter, and now they can take control of their desk too. The Height Adjustable Collaborative table allows you to choose the desk height that you want to work at. Move from sitting to standing all at the push of a button. Of course we also include options for charging and AV connectivity, storage and control.

For classrooms, lecture theatres, breakout and social spaces.

t41 Family

The original and best agile student table. In rows, waves, clusters or circles you can have any layout you like. Or flip the top up and nest them together to clear a space – you're in control.

t41 Individual Student Table 60°

For agile and adaptable learning spaces

In rows, waves, collaborative groups, clustered round a mobile power and/or data hub for ICT or stacked horizontally to clear a space, t41 responds to the unique demands of each lesson.

60° version allows six t41s to cluster in a circle around a **zioxi** Wireless powerHub (see page 34).

For classrooms, breakout spaces and libraries.

zioxi t41 Roundel - perfect stationery solution for centre of t41 tables.

Finishes
Mild steel frame, epoxy-coated to RAL9006 (silver). Worksurface compact laminate. Available in 5 different heights.

Product Code	Description	Dimensions
T41-60M-S2-C	60° student table with tip-top compact worksurface	76W x 60D x 53H
T41-60M-S3-C	60° student table with tip-top compact worksurface	76W x 60D x 59H

Tables

Big ones, small ones, lots on wheels, one that tilts, and lots that go up and down. Round, square, wedge shaped, rectangular, trapezoid and one in the shape of an apple. And you thought you knew tables...

zioxi tO3 Tables

Easy desking system

The **zioxi tO3** is the simplest way to create functional desks. With multiple shapes and sizes to suit your need you can equip even the largest of areas with seamless desking. It's easy to integrate power units for on desk charging, or add CPU holders or VESA mounts for computers. You can even have them height adjustable too.

For classrooms, offices, social spaces or ICT suites.

Refectory Tables

Bold, contemporary style for maximum capacity

Hard wearing, easy to clean and looks really cool. Just the thing to liven up your dining areas and encourage students to eat together – and the lack of defined seating numbers means additional capacity if they shuffle up a bit. Or take dining to a new level with poseur height tables.

For dining areas, refectories, canteens and cafeterias.

Refectory Table with Steel Frame

Poseur Table

Refectory Table

Finishes
Durable laminate construction table tops. Available with ply look PVC edge or matching PVC edges.

The zioxi touch

*So, why do people choose zioxi?
What makes us different?*

It all comes down to our people.

We have teams of dedicated, talented people, passionate about their work to design, build, plan, manufacture, deliver and install furniture that supports and inspires learning.

It's not your job to know how to put learning spaces together – it's ours, and we take great pride in supporting our customers from start to finish. We are highly involved at every stage of the process – helping make good decisions, giving accurate plans and costs, checking we've got the order right, delivering when we say we will, installing it and making sure everything has gone to plan.

Only when we see a completed installation and we've cleared away the packaging to leave a shiny new learning space (or a much enhanced old one) and a happy customer do we consider it 'job done'.

It's the **zioxi** touch. And here you can learn more about what we do and how we do it.

01 Consult

Every customer is unique and has their own vision. The first step for us is to listen, so we understand what you are trying to achieve. Then we show you different ways of making it happen. And we don't just specify our own designs. If we know another manufacturer has the perfect product and it meets our quality criteria, we'll suggest it.

02 Design

We're problem solvers at heart. We constantly question the status quo, wonder why things are the way they are and ask if there is a better way. We like our products to be clever, beautiful and simple to use so you love them as much as we do.

03 Plan

Measure it, measure it again, go away, have a cup of tea and then go back and measure it again... Or ask us to do it for you. Whether it's a single room or an entire building, you need to be sure it fits, that you can get power to where you need it, and that it allows enough space for moving around. Our space planners provide detailed layouts so you can see how it's going to work.

04 Test

As well as consulting staff and learners, we talk to a broad range of industry experts, from designers and manufacturers to ergonomists. This keeps us informed about all the latest developments in materials, manufacturing techniques and design.

05 Manufacture

Build quality is paramount. We use materials and manufacturing processes that ensure our furniture can withstand the inevitable knocks and scuffs, while retaining its good looks. Welding, rather than crush-bending, is robust and looks better. Alloy inserts make joins ultra-strong and compact laminate tops are a solid piece so the edges won't peel off your tables. It's this attention to detail that makes all the difference.

06 Schedule

When do you want it delivered? And where is it going? Is there a lift? And can we just check that you definitely want this colour, on glides, not castors? We want your order, your delivery and your installation to be right first time. That's where our sales support and scheduling teams come in. They will calmly guide you through the process (and make sure you don't order Reception-size chairs for enormous Year 11s).

07 Assembly

Our furniture doesn't simply roll off the end of a machine. It's a fundamental part of **ziox** quality that our unique designs are assembled by our highly skilled production team. They use quality components to create products that are a cut above in terms of quality.

08 Logistics

Our logistics teams are the people who round up the right products and package them ready for transportation to arrive at the right place at the right time. No mean feat when you work with customers the length and breadth of the country.

09 Delivery

As a group we have stringent targets to reduce our emissions and mileage as well as our paper consumption. We segregate all our manufacturing waste for recycling and we comply with the WEEE directive, battery directive, RoHS and Packaging waste regulations and directives.

10 Installation

Our installation team are all fully trained **ziox** employees. We don't rely on third parties to deliver our furniture (unless it's a single item and you'll know exactly what to do with it) and we don't just leave it in reception for you to deal with. We unload, unpack, install, make sure everything's working, show you how to use it, clear away the packaging, sweep up and – once we've seen the smiles and you're happy – only then do we leave.

11 The ziox Touch

"Learning environments should be bright, engaging, seductive and of course effective. They should lift spirits, inspire, surprise and challenge. People want to learn and discover; learning environments should help them to do so ambitiously and together. I'm a great fan of **ziox** furniture because it can do all this. It is agile, practical and designed around learning. Right now, they are leading a revolution in learning space design."

Case Studies

The proof of the pudding.
The evidence. This is what it looks
like in the real world. Real life case
studies from five of our
recent projects.

University College London

The refurbished library has 105 study spaces. These can either be computer spaces, or, they convert with a touch of a button to study spaces without a computer.

zixi were thrilled to work with UCL on a project to supply study space furniture to increase the number of fixed computer positions throughout the University.

The aim of the project was to add 600 student positions across 12 sites in London to increase the number of fixed computers for students access.

The furniture installed was a combination of solutions. Some areas had steel framed bench desks with adjustable monitor arms for all in one PC's. A space efficient way to maximise the number of students to be accommodated

in a work space whilst providing ample room for each student.

UCL were keen to make as many desks as possible multipurpose so students could bring their own devices as well as using the IT provided so **zixi** designed desks with integrated computers that rise and lower at the press of a button with Power and USB access on top to allow the students to plug in laptops/phones. Each space had a height adjustable desk to ensure DDA compliance.

In the library **zixi** designed a bespoke reception and installed an acoustic meeting pod for quiet meetings and study.

Arnot St Mary

zioxi worked with Arnot St Mary Primary School to create a large open plan Discovery Hub divided into several zones.

The brief was to furnish a new large open plan learning space providing state-of-the-art facilities and equipment.

The open plan design was broken up into three main zones for IT, flexible learning and a mezzanine space. **zioxi** designed the IT zone with desks integrated with cable management for the iMacs, a TeacherWall® for lessons and resource storage and magnetic glassboards for collaborative brainstorming. A BookWorm divided the IT suite and LRC whilst keeping

"The new Discovery Hub is very exciting. Big thanks to @zioxiuk for fantastic furniture design!"

the area open and the LRC was furnished with **zioxi** t41 desks with powerHubs, a BookHive and Park seating.

Two separate classrooms were also furnished, one with **zioxi** t41 and Lunar tables. With the ability to be easily moved t41s are ideal for smaller group or individual work. The second room was fitted with **zioxi** T chairs and s41 soft seating and the area was divided by a small BookWorm with additional soft seating for a more informal approach to learning.

The mezzanine floor area included s41 Hex, Hug and Boo seating. The colours throughout the whole space are bright, bold and inspiring.

Parkstone Grammar School

"The soft furnishings and colours make it a comfortable space for all types of down time and learning"

Parkstone Grammar School asked zioxi to create an incredible sixth form resource area and media centre and a bright and modern study and relaxation space for their sixth form students"

The space needed to be multifunctional and flexible, allowing for a range of ways of studying and the area needed to feel formal and grown up and be broken up into zones. To make best use of the space **zioxi** t41 desks with wired powerHubs were added to the room as part of the study area, with coloured glass boards for collaborative work. Plenty of soft seating was included to create a relaxed

atmosphere and create zones for socialising and downtime. As the room is used by 300 students daily for private study and relaxing, the kitchen area was fitted with poseur tables with seating to outside views.

The media centre brief required a space where students would spend long hours so the furniture needed to be comfortable and it was also used as by the cinema club so all the furniture had to be flexible, whilst also secure for the iMacs. **zioxi** introduced P8 powerUp tables so all the desks could be transformed from worksurfaces to IT desks in an instant which were perfect for the space.

Seymour Park Community Primary School

zioxi worked with Seymour Park Community Primary School in Manchester to create a brand new state-of-the-art IT suite.

The brief was to completely revamp a large IT room drawing inspiration from innovative tech spaces such as Google. The new space houses 30 computers, acoustic Teacher's pod, flexible classroom area and a Reading/iPad hideaway. **zioxi** designed the IT zone with P1 desks where monitors go up & down at the touch of a button or remotely by using **onView**. The flexible zone combines easy to reconfigure soft seating and hubTables with powerDomes so the students can plug in their

"It is the most incredible space and we are really grateful to zioxi"

Anthony Rae, Head Teacher.

devices, a TeacherWall where there's space for display screen, storage & laptop charging bays, and a CubeWall with a reading & recording hideaway designed to provide a quiet place to learn for students that are easily distracted.

An acoustic pod provides teachers with a quiet place to mark work or hold meetings whilst doubling up as a quiet space for children to record podcasts for digital projects. The colour scheme in the whole space is bright, bold and inspiring.

It was a real pleasure working with Seymour Park on this project and they are very pleased with their fabulous new learning space!

Liverpool School of Tropical Medicine

zioxl M1 collaborative desks were the chosen solution for the school's Active Learning Lab.

Liverpool School of Tropical Medicine were looking for integrated technology furniture for their new Active Learning Lab.

Active learning encourages deeper thought, analysis and collaboration in order to strengthen learning and requires furniture that facilitates this. **zioxl** integrated M1 collaborative desks were the chosen solution.

Seven M1 desks were positioned around the room in a circular configuration each accommodating eight students. Dual screens were installed at the end of the desks allowing the students to collaborate together by sharing images from their screen with the other

students at their own collaborative desk or around the training room.

The space needed to be multipurpose with computers provided for student use. These computers also needed to be hidden away when necessary to allow for laptop use within the space. The M1 mechanism is the perfect way to do this. Simply press to reveal the monitor, mouse and keyboard, which all rise out of the desk ready for a learning session.

Different colours were used to differentiate each bank of desks and comfortable chairs were added to finish off the space.

The background is a solid teal color with a subtle, out-of-focus texture of grass blades, giving it a natural and organic feel.

How to order

All the information you need – contact details, information about delivery and installation.

Placing your order

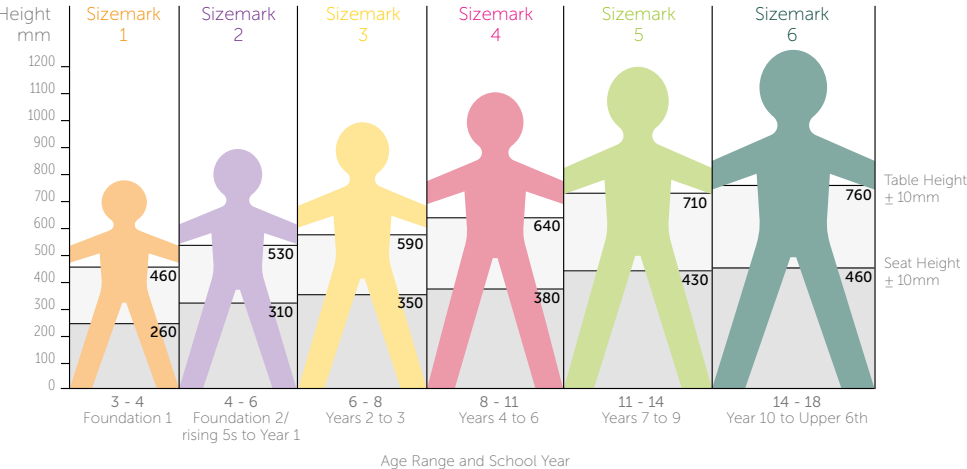

tel: 01844 280123

Between 9am and 5.30pm Monday to Friday for all enquiries or to place an order
fax: 01844 281373 email: info@zioxi.co.uk

Customer Service

zioxi is renowned for superb customer service. We don't simply deliver and run. We make sure it fits and that you know how it works. If you have any questions we will do our very best to help. To ensure we get it right first time please give us as much information as possible, including:

- Specification – have you specified colour and size?
- IT specification – if you are ordering products into which you are integrating IT, such as those in the Integrated IT section, you need to tell us the specification of the equipment that's going into it, including CPU/monitor size.
- Contact details – name and number of the person who will be taking delivery.
- Out of school hours – if you are taking delivery or booking an installation out of school hours, eg during school holidays, we need contact details (name and mobile phone number) of the people who will give us access to the site.

zioxi Limited, 57 High Street, Tetsworth, Oxfordshire OX9 7BS, UK.

Catalogue guide

- Product requires on-site installation
- Product will stack to quantity indicated above
- All measurements indicated = cm Width (W) x Depth (D) x Height (H)

Delivery

Lead times – most products are available six weeks from order. Actual delivery date will be confirmed once order has been processed.

Delivery charges are quoted on a case by case basis.

It is assumed that products are delivered to the ground floor with reasonable vehicular access and we reserve the right to add supplementary charges if access is difficult.

If delivery is to anywhere other than the ground floor please advise if there is lift access and the dimensions of the lift. It is essential that we know these details to ensure we send the appropriate team and equipment to ensure a smooth delivery.

Installation

zioxi IT desks, cupboards, cabinets, lockers and trolleys are designed to accommodate most proprietary hardware. When ordering, please advise the specification of the kit you intend to install so we can confirm that it will fit.

IT hardware and accessories are not included in the price.

Standard delivery does not include the installation of hardware, cabling or accessories in any of the **zioxi** IT desking products. If you require installation there will be an additional fee. Please ask for details.

Terms and Conditions

Please see www.zioxi.co.uk for full terms and conditions.

Continuous Improvement

Due to variation in materials, developments and improvements in design, we may alter the specification and appearance of our products from time to time without notice.

The zioxi Guarantee

Our furniture is designed to withstand educational environments. We use materials, components and manufacturing methods that make our products a cut above in terms of quality. That’s why we offer the following as standard.

10 years

A decade. That’s our standard guarantee on all products with no moving or electrical parts.

5 years

Five years is our guarantee on products with moving parts like hinges, castors, cranks and other mechanisms and all soft seating products.

2 years

All electrical components within our products and our acoustic pods are guaranteed for two years.

Standard Guarantees

What happens if there is a problem?

If any defect, malfunction or failure occurs which is not the result of abuse, accidental damage, inappropriate use or mishandling, we will repair or replace the part or product free of charge. This guarantee is subject to terms and conditions which you can find on our website at www.zioxi.co.uk.

All product guarantees are detailed on the individual product specification sheets so please check these if in doubt. These can be found on our website www.zioxi.co.uk or give us a call and we will happily discuss.

Proper Job!

We take pride in doing things properly. Our accreditations and furniture industry memberships can be found below:
